SOUTH TEXAS DENTAL ACQUIRES ALL SMILES GENERAL DENTISTRY PRACTICE IN DALLAS, FORT WORTH AND HOUSTON

HOUSTON, TX (August 19, 2013) – South Texas Dental, which operates family dental centers in Houston, Dallas, Fort Worth and San Antonio, has acquired the 14 offices of the All Smiles general dentistry practice.

Each of the acquired offices (twelve in the Dallas/Fort Worth area and two in Houston) will be re-branded as South Texas Dental and continue to offer a variety of family dentistry services. Staffing levels and hours of operations at each of the new South Texas Dental offices also will remain unchanged. Each office will accept Medicaid, CHIP and most insurance providers.

“This transaction allows us to acquire dental centers with an established base of satisfied patients,” notes Dr. Chad Park of South Texas Dental. “We spent a great deal of time evaluating each center and patient charts before proceeding with the acquisition.”

The re-branded South Texas Dental offices are located throughout the Metroplex in Dallas (6780 Abrams Rd., 817 W. Jefferson Blvd. and 8928 E. RL Thornton Fwy), Fort Worth (4200 S. Freeway and 2482 Jackson Hwy.), Arlington (2628 Matlock Rd and 1604 New York Ave.), Garland (2121 W. Walnut St.), Grand Prairie (106 E. Main St.), Haltom City (5201 E. Belknap), Irving (1111 S. Irving Heights) and McKinney (753 N. McDonald). The two new
South Texas Dental offices in Houston are located at 6729 Airline Drive and 1173 Edgebrook Drive.

Owned entirely by its dentist partners who make all decisions involving patient care, South Texas Dental now operates 38 family dental centers offering general dentistry procedures for patients of all ages. The family dental practice was founded in 1993 and reports a patient satisfaction of 93%, according to an independent research firm which contacts patients after their appointment.

In addition to operating its family dental practice, South Texas Dental participates in health fairs, Head Start events and other gatherings where its dentists present complimentary toothbrushes and provide information to promote positive oral health.
